iOS on iPhones, iPads, and iPods allows you to enable Safari pop-ups for all websites but doesn't let you customize specific website settings like on a Mac. Pick one of the pop-up settings available: allow, block, or block and notify. Allow Safari pop-ups on iOS.

Feb 5, 2019 - If you're a Safari user on the Mac and you need access to pop-up windows for whatever reason, there are several options available to enable.

allow safari to access camera iphone

allow safari to access camera iphone, allow safari to access camera mac, allow safari pop ups, allow safari during downtime, allow safari to access camera, allow safari to use location, allow safari to open apps, allow safari cookie, allow safari to access camera ipad, allow safari to access photos, allow safari to accept cookies, allow safari screen time

allow safari pop ups

allow safari to access camera
